1 Jaun Paul Sartre

No finite point has meaning without an infinite reference point.

```
#include <iostream>
using namespace std;
int main()
{
    int n, i, m=0, flag=0;
    cout << "Enter the Number to check Prime: ";
    cin >> n;
    m=n/2;
    for (i = 2; i <= m; i++)
    {
        if (n % i == 0)
        {
            cout<<"Number is not Prime."<<endl;
            flag=1;
            break;
        }
    }
    if (flag==0)
        cout << "Number is Prime."<<endl;
    return 0;
}
```
